**ANNOUNCEMENT**

**Profit Warning**

Compared to 2022, in 2023 the Turnover is significantly increased, while the Operating Profit from usual/existing operations is increased, mainly due to the broader range of available products in the distribution sector. Profit after Tax is expected to be significantly increased, despite the substantial increase in financing cost, mainly due to the share in the profit of the associated company Demetra Holdings Plc, taking into consideration its nine-month results.
