

Information Security Policy

The Information Security Policy of Logicom Public Ltd demonstrates our commitment to ensuring that security is a cornerstone and is maintained at the highest level for all services provided to our Technology Producers and Technology Resellers.

This commitment is achieved through a team of highly skilled and qualified professionals who ensure that information security standards are consistently applied. As a result, the company maintains its competitiveness and safeguards sensitive information while delivering global expertise and local reach, pre and post sales support and training, multiple routes to market, marketing and channel enablement, supply chain and logistics, compliance and process controls, technology infrastructure, sales support, credit and financing services, portfolio services, opportunity engagement and business planning to partners and customers in Cyprus and abroad.

Information Security is of the highest importance and is maintained through the establishment and application of strong controls and measures, supported by a framework of policies and procedures within a robust Information Security Management System. The Management of Logicom Public Ltd is committed to providing high quality services in line with customer requirements, while complying with applicable national laws, regulations and recognised information security best practices and standards.

Logicom Public Ltd has adopted and implemented an Information Security Management System (ISMS) which complies with the requirements of ISO IEC 27001:2022, supporting the structuring, maintenance and continuous improvement of policies, procedures and controls to safeguard the confidentiality, integrity and availability of information and related processing facilities.

Through the ISMS, Management continuously sets information security objectives and targets and evaluates performance using relevant information security indicators. These objectives and targets are reviewed on a systematic basis during management reviews, with the aim of continual improvement of the Information Security Management System, its policies and procedures and the overall corporate performance of the company.

Our strengths lie in our highly qualified and experienced personnel, our long standing relationships with world renowned partners and vendors and our strong brand name and reputation with our customers and the market in general.

Anthoulis Papachristoforou
Deputy CEO/Group CFO
